# **Encrypting a Microsoft Word Document and Opening an Encrypted Document**

In some cases, you may need to send files or emails using encryption, also known as password protection. This secure format requires recipients of your shared file or email to enter a password to view the shared content.

This article describes how to encrypt a Microsoft Word document on a Windows<sup>®</sup> and macOS<sup>®</sup> device. It also provides best practices for sharing the password for an encrypted document and describes how recipients of an encrypted document can open it.

## **Encrypting a Microsoft Word Document**

**Warning**: Before encrypting a Microsoft Word document, save a copy of the document as a backup. If you encrypt a document and forget the password you created for it, you will not be able to open the document.

#### Windows

- 1. Open a Microsoft Word document.
- 2. Click File at the upper-left corner of the document. The Info screen will be displayed.
- 3. Click Protect Document and select Encrypt with Password (Figure 1).

- **4.** On the **Encrypt Password** window, enter the password recipients will need to provide to open the document and click **OK**.
- 5. Enter the password again and click **OK**. A message stating "A password is required to open this document." will be displayed on the **Info** screen (Figure 2).

Figure 2

6. Save the Microsoft Word document.

#### macOS

- **1.** Open a Microsoft Word document.
- 2. Click **Review** in the ribbon along the top of the document. The **Review** tab will be displayed (Figure 3).

- 6. Click OK on the Password Protect window.
- 7. Save the Microsoft Word document.

## Sharing the Password for an Encrypted Document

Use one of the following methods to share the password needed to open an encrypted Microsoft Word document:

- In-person: Share the password verbally with the recipient.
- Telephone or video call: Call the recipient and provide the password verbally.
- **Text message**: Send the recipient the password via a text message.

# **Opening an Encrypted Microsoft Word Document**

When you try to open an encrypted Microsoft Word document, a **Password** window will be displayed, prompting you to enter a password (Figure 6). Enter the password created by the document's owner and click **OK** to open the file.

Password		?	×
Enter passwo	ord to open file		
C) 11 )		all and	1
C:\Users\	\Desktop\encry	otion-test.c	locx
C:\Users\	Desktoplencry	otion-test.c	locx

**Important**: If the password you entered is incorrect, an error message stating that Word cannot open the document will be displayed.
